

Capita Selecta Duikgeneeskunde  
**International Symposium**  
Diving of women, children and  
divers with a disability

Saturday 30 March 2019

09:15 – 17:00

Academic Medical Centre, Amsterdam

The aim of this symposium is to offer insight in the special physical and mental challenges and disorders that may restrict or prevent diving for women, children and people with a disability.

After this symposium, the physician will have the knowledge required to decide whether women, children or persons with a disability are fit to dive in a recreational setting and if it is necessary to recommend or impose restrictions or limitations to ensure the safety of all involved.

Since this symposium should be seen as an advanced course, an elementary course on diving medicine is a prerequisite for physicians.

We like to encourage participation from abroad, therefore all lectures will be delivered in English.

### Agenda 2019

30-03-2019 Diving of women, children and divers with a disability.
